

 UNOFFICIAL NEPALI SCHOOL GUIDE

IT Education in Nepal

How we survived MS Paint, 3D Pinball, and the sacred rules of the computer lab without blowing up the motherboard.

Chapter 1: The Sanctuary

Inside the mysterious air-conditioned room that required more rituals than entering a temple.

Computer Lab Sacred Rules

Shoes Outside!

Shoes were left at the door regardless of winter cold. Dirt on the floor was strictly forbidden near the sacred monitors.

Velvet Covers

Computers spent 90% of their lifespan wrapped in thick velvet dust covers, only unveiled for special inspection days.

No Screen Touching!

Pointing at the CRT screen with your finger closer than 5 centimeters triggered an instant disciplinary warning.

Legendary IT Curriculum

Theory > Practice

Memorizing "Steps to Shut Down a Computer" in your copy for a guaranteed 10 marks in final examination.

Writing complete QBASIC code on lined paper using pencil, while never actually touching a physical keyboard all trimester.

MS Paint: Peak Graphics Engine

The Universal Artwork

Every student drew identical scenery: two triangular mountains, a half-sun with exactly 8 sharp yellow rays, a V-shaped bird flock, and a blue river flowing straight out of the valley center.

Paint Bucket Disaster

Accidentally clicking the Fill Bucket on a 1-pixel line gap and helplessly watching your entire masterpiece get swallowed by pitch-black paint, with Ctrl+Z as your only remaining savior.

Key IT Skill Metrics

60

WPM Target Speed

TypingMaster Prestige

Nobody cared about nested FOR-NEXT loops in QBASIC. True legendary status in class was unlocked by reaching 60 WPM on TypingMaster Pro or dodging underwater hurdles in Mario Teaches Typing before the teacher turned around.

Computer Teacher Lore

School Printer Technician: Regularly summoned to the Principal's office to fix printer paper jams and cable loose connections.

Solitaire Grandmaster: Plays Spider Solitaire with blinding speed while students painstakingly copy CPU definitions from the whiteboard.

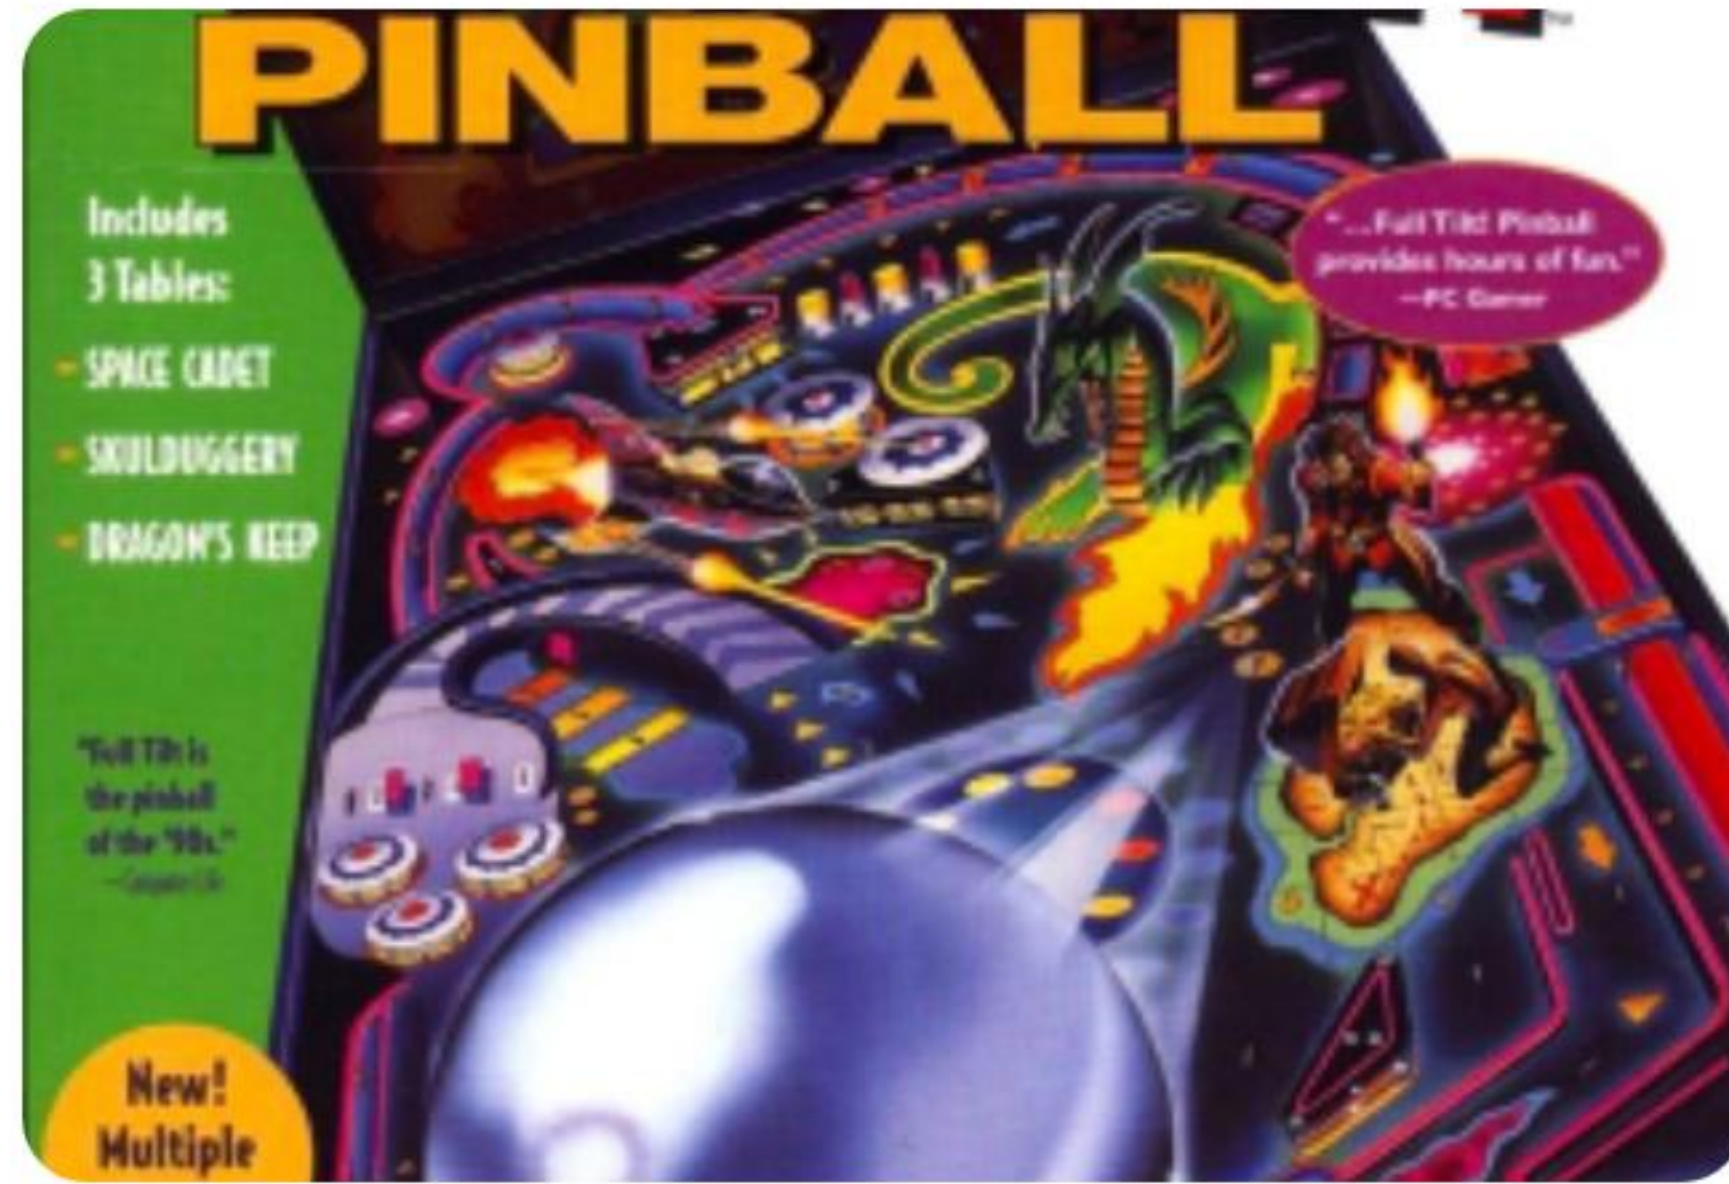

Forbidden Desktop Folder: Maintains a mysterious folder on Desktop named "New Folder (3)" that nobody was permitted to double-click.

Enter Key Threat: Warns students that hitting the Enter key too hard will immediately shatter the motherboard.

Sacred Computer Games

3D Pinball Space Cadet

 Road Rash Racing

Road Rash & Virtua Cop

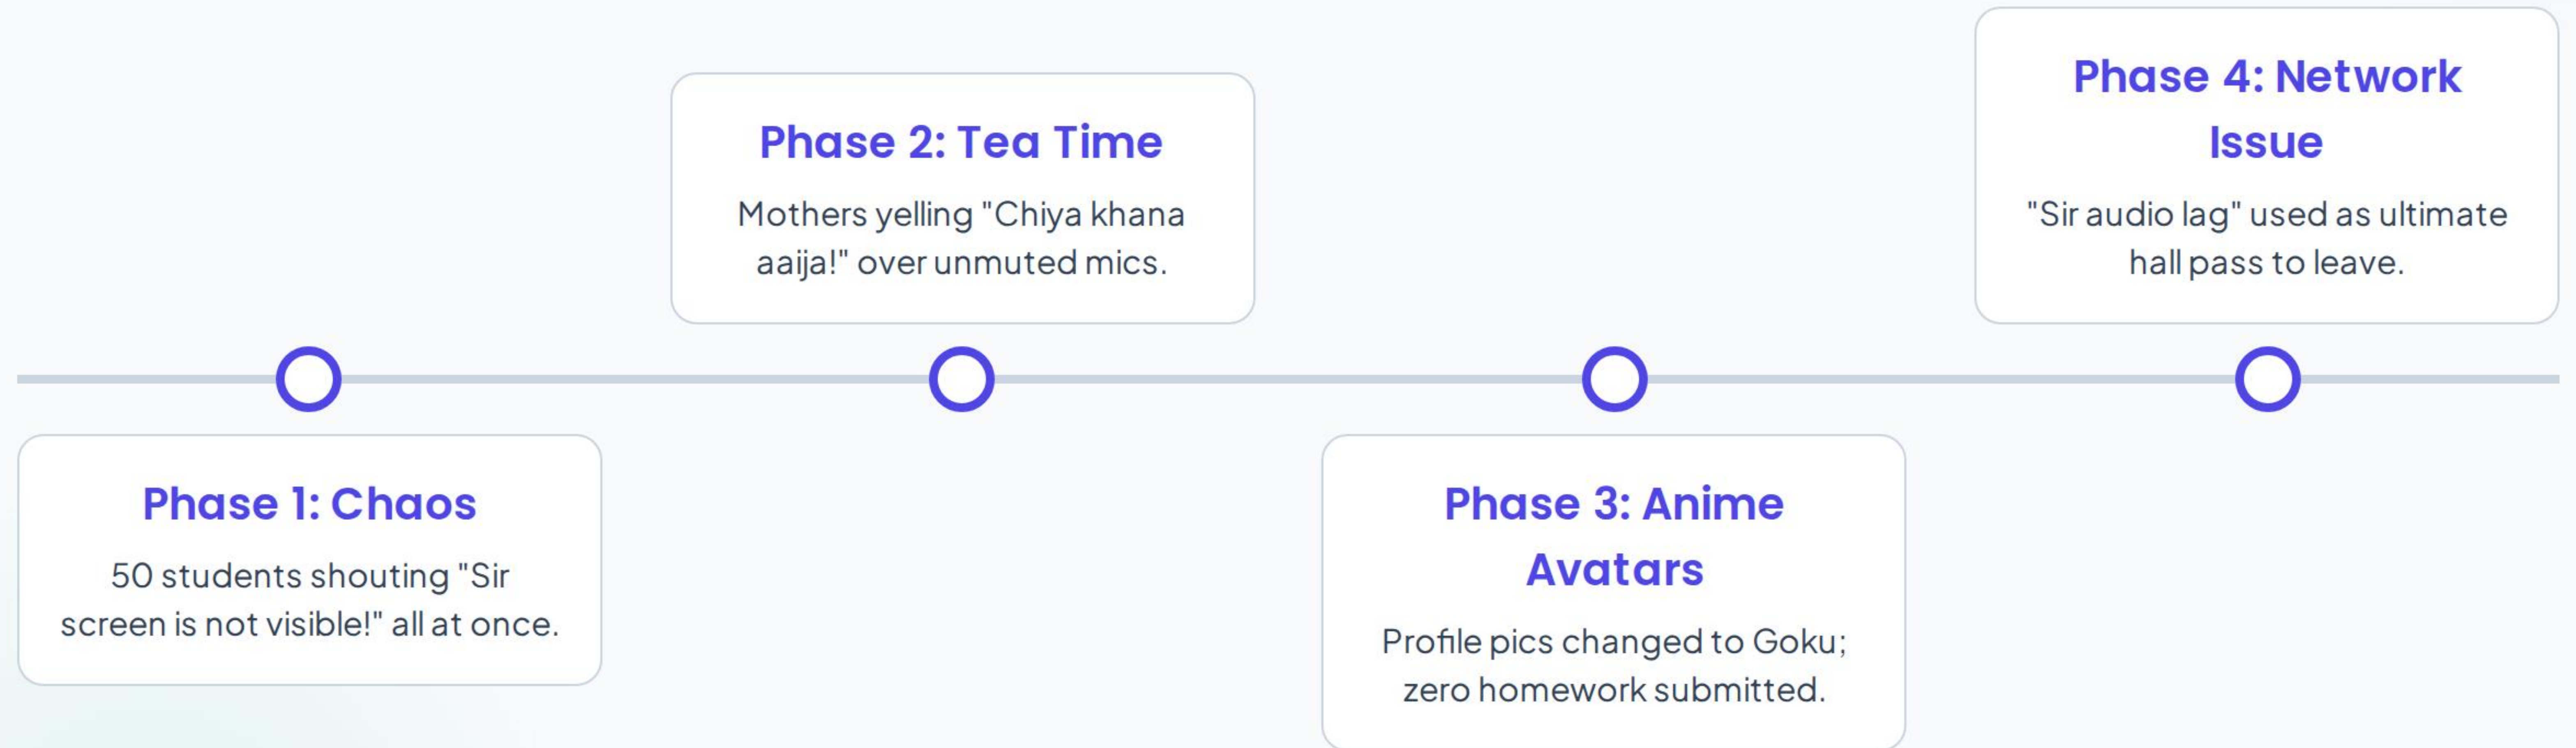

Dangerous Dave

Lab Time Allocation

Scientific breakdown of how a standard 45-minute computer period was consumed across Nepali schools.

Online Class Chronicles

Eternal Wisdom of Page 1

"Computer is an electronic device which accepts raw data as input, processes it, and gives meaningful output."

— Page 1 of Every Nepali Computer Science Textbook Ever Printed

Any Questions?

Please do not ask QBASIC questions. I forgot them immediately after SEE exams.
